

FlexCart™ Products Catalog

FlexCart makes the best maintenance and engineering carts ever built!

Our focus is on building carts that are:

- 1. Extremely space efficient, compact and easy to move.**
- 2. Time saving and efficient with built-in, simple organization.**
- 3. High in quality and built to last.**
- 4. Beautiful in their design and appearance.**

All of our carts include these important features:

- Narrow, light and very maneuverable.
- Manageable size with lots of storage space.
- Quiet, durable, nonmarring, lockable wheels.
- Locks completely with provided pad locks.
- Padded drawers and fabric tool holders provide quiet operation.
- Durable metal construction.
- Removable trash bin.
- Labeled pockets for tool accountability.
- Drawers include parts organizing bins.
- Built-in vise clamp.
- Includes our tool bag carried in the handle.
- Carries up to a 6' ladder.
- Large fabric pocket panel on the side provides storage for many different items.
- Two large storage areas on the bottom.
- Cart dimensions: 14.5" W x 37.5" L x 45" H.
- Patented with patents pending.

FC-100

PM and General Purpose Cart. This is our original, award winning, stainless steel engineering cart. In addition to the above features this cart also includes a locking front tool compartment that comes complete with labeled fabric tool holders designed to carry the larger, standard tools typically needed by most engineers. **This cart, as well as our others, has been proven to increase the productivity of the engineer using it by an average of 40%.**

FC-100WT (With all tools)	\$2,999.00
FC-100WBT (Bag tools)	\$2,599.00
FC-100NT (No tools)	\$2,299.00

FC-100CS

PM and General Purpose Cart. This cart has features that are exactly the same as our original FC-100 cart above accept it is made of durable powder-coated carbon steel. It features a very attractive silver coating in place of the stainless steel and provides all of the same functionality at a lower price point.

FC-100CSWAT (With all tools)	\$2,649.00
FC-100CSWBT (Bag tools)	\$2,249.00
FC-100CSNT (No tools)	\$1,949.00

FC-200

General Purpose and Trades Cart. This cart includes all of the features listed above and is the same size as the FC-100. The only difference is that the front tool compartment has been removed and the drawers lengthened to fill in the space. This change also provides a larger work surface on top and allows the user to load the cart with their own trade specific tools. The FC-200 is a great, all-purpose cart that works extremely well for general maintenance, tradespeople and special purposes such as ice machine or other PM work. It includes heavy duty drawer slides on the 3 and 4" drawers to handle tougher applications.

FC-200WAT (With all tools)	\$2,399.00
FC-200WBT (Bag tools)	\$1,949.00
FC-200NT (No tools)	\$1,649.00

FC-300

Painter's, Trades and Large Equipment Cart.

This cart has the same structure as the FC-200 except the bottom 4 drawers have been removed and this area is covered by two large locking doors. The FC-300 is available in two configurations. The FC-300PC is a Painter's cart. In this configuration the large cabinet area accommodates two 5-gallon paint buckets or up to eight 1-gallon cans and the tool bag is replaced by a special storage bin. In the FC-300LE, the maintenance cart version (shown in the photo) the FlexCart tool bag is provided and the storage cabinet is used to store and transport larger pieces of equipment. The storage area comes with 2 shelf brackets installed allowing a shelf to be added to divide the space inside if needed. Cabinet size: 24W x 13D x 16H.

Painter's Cart:

FC-300PCWT (With tools)	\$1,999.00
FC-300PCNT (No tools)	\$1,599.00

HVAC, Trades and Large Equipment:

FC-300LEWBT (Bag tools)	\$1,899.00
FC-300LENT (No tools)	\$1,649.00

FC-400

Painter's, Trades and Large Equipment Cart. This cart is very similar to the FC-300 above except the storage cabinet is smaller allowing room for four drawers instead of three, adding a 4" drawer just above the cabinet. The FC-400PC provides another option to professional painters who use gallon cans instead of 5-gallon buckets. This cart can carry up to ten 1-gallon cans. Just like the FC-300, this cart is also available in a design for maintenance pros, the FC-400LE. This cart is great for people who need to carry and secure larger pieces of equipment such as Carpenters, Bio-Med, locksmiths, IT and others. Additionally, this cart is also sold as a light bulb cart called the FC-400LBC. In this model the tool bag is removed and the space inside of the handle is redesigned to carry a large box of T-12 lightbulbs. It also provides ample room for other bulbs, ballasts and lighting parts in the drawers, cabinet and fabric storage panel on the side. Cabinet size: 24W x 13D x 12H

Painter's Cart:

FC-400PCWT (With Tools)	\$2,099.00
FC-400PCNT (No Tools)	\$1,659.00

Trades and Large Equipment Cart:

FC-400WAT (All tools)	\$2,399.00
FC-400WBT (Bag Tools)	\$1,949.00
FC-400NT (No tools)	\$1,699.00

Light Bulb Cart:

FC-400LBC (No tools)	\$1,599.00

FC-30 Tool Bag

Maintenance and Engineering Tool Bag. This incredible Tool Bag is the result of a two-year partnership with three major facilities companies to develop the most functional and efficient engineering/maintenance tool bag possible. Designed and tested by facilities engineers, from the ground up, the FlexCart tool bag was built to deliver the exact functionality needed in a durable, compact and lightweight design. Now In service with thousands of engineering departments across North America, the FlexCart Tool Bag has proven to be a valuable tool for maintenance professionals. The bag includes 42 labeled pockets to carry and track the 84 primary tools needed by an engineer. It also includes a parts box on the bottom, a carry handle, a shoulder strap, extra storage space inside the bag and a unique, no-tip design.

FC-30TBWT (With Tools.)	\$499.00
FC-30TBNT (No Tools.)	\$99.00

FC-50 FlexKit™

Small, Light-weight, Carriable Maintenance Cart. The FlexKit is a suitcase sized, light-weight, quick call engineering cart that was designed with input from hundreds of engineering professionals across North America. It was designed to deliver as many of the features and functions of our award winning FlexCart Engineering Cart as possible while maintaining a small, very portable size that is easily carried up-stairs and loaded into a vehicle. It features a light-weight aluminum body with three specially designed, patent pending parts boxes. The FlexKit has durable 4" rubber wheels with precision bearings, a strong light-weight extendable handle, a locking top cover, a locking system for the parts boxes and a pre-attached cable for securing the entire cart in a particular location. The top of the cart accommodates our very popular FlexCart Tool Bag. Around the outside of the FlexKit pockets are situated that are sized to carry commonly needed larger tools. It also includes two hooks on the front for carrying a 2' step ladder and an integrated carrier for the CleanCase Invisible Plunger seen below. Dimensions: 14W x 16D x 24H.

FC-50NT (No tool bag or tools)	\$499.00
FC-50WTB (With tool bag, no tools)	\$599.00
FC-50WBWT (With tool bag and tools)	\$899.00

CleanCase Invisible Plunger™

We spent thousands of hours talking with Engineers about their work. One of the most commonly discussed issues is the uncomfortable nature of transporting a plunger through their facility, which is generally done either in a bucket or a trash bag. In both of these cases it is obvious to the patient, guest, resident or tenant what the Engineer is carrying and as a result causes an uncomfortable situation for them and the Engineer. The CleanCase Invisible Plunger is a brand new approach to the plunger and how it is carried and used in a facility environment. It disguises the plunger in a special case and allows it to be carried through the facility without anyone knowing what it is. It also carries the plunger in a more sanitary manner, first by covering the plunger head with a special plastic bag and then by encasing it in a patent pending case with a handle on top. The CleanCase comes with 30 plunger head bags, which are also available for purchase separately, and a storage hook. The included plunger tool is also innovatively designed to be a more professional, better functioning tool. It has a high-quality plunging head and a unique padded, ergonomic handle that extends to a length of 25" (normal handles are 17") keeping the operator back and away from the problem they are addressing.

CC-100 (CleanCase With Plunger)	\$43.00
CC-100PC (CleanCase Without Plunger)	\$18.99
CC-100PHB120 (Plunger head bags, 120 pcs)	\$15.00
